

PET EVACUATION TIPS

- **Remember, if it's not safe for you to be in your home, it's not safe for your pet either.**
- **As the wildfire approaches or you are on stand-by evacuation notice, bring your pet inside so you won't have to search for him or her if you need to leave quickly.**
- **Know which hotels and motels along the evacuation route will accept pets.**
- **Make sure that your pet's vaccinations are current. Many pet shelters require current proof of vaccinations.**
- **Make sure that all dogs and cats are wearing collars with securely fastened, up-to-date identification.**
- **Consider having your pet microchipped.**
- **Have a sturdy leash, harness and/or a carrier for safely transporting your pet to ensure it can't escape.**
- **Have pet food, drinking water, bowls, cat litter, litter pan, and a manual can opener to open pet food, if needed.**
- **Have medications and copies of medical records stored in a water proof container.**
- **Have current photos of your pet in case he or she gets lost.**
- **Have information on feeding schedules, medical conditions, behavior problems, and the name and number of your veterinarian in case you have to board your pet.**
- **Bring pet bed and toys if they can be transported easily.**
